

IN THE SPECIFICATION

On page 7 in the third paragraph on the page please amend the specification as follows:

The building 5 has rails 4 attached to the outside face. The rails 4 are preferably recessed into a groove 12 in the building surface ~~for~~ for protection against the elements and are H shaped. The rails 4 have guide slots 7 for receiving thrust wheels 6 on the elevator, which stabilize the elevator on the rails 4. The rails 4 have teeth 70 for engaging cogwheels 8, turned by drive units 11, which are preferably electric motors. The drive units 11 raise lower or stop the elevators 3, 103 and 203.
